MicroThermics Goes LIVE Always Innovating For You

MicroThermics is holding educational webinars and you are invited! This is a 3 part series about UHT, HTST, and Aseptic R&D Processing. We will be covering the "Why's" and "How's" of R&D processing for:

- Steam injection UHT/Aseptic processing of Plant Based and Dairy Products
- HTST/High Acid Aseptic processing of juices and beverages
- Indirect UHT/Aseptic Processing for Plant-Based and Dairy Products

Each webinar will be about an hour long. It will include:

- Slide presentation about the process relating to the products
- Live demonstration of the product and process from MicroThermics lab
- Live Question and Answer session

Come to 1, 2 or all 3! We can't wait to see you!

Space is limited and we have had considerable interest, so sign up early!
